## Step 2:

Add a few more lines with the ruler and pencil. Connect some lines (perpendicular), but do not cross the lines.

Step 3:
Add even more lines with the ruler and pencil. Connect some lines (perpendicular), but do not cross the lines.

Step 4:
Start anywhere. Keep lines in a group and repeat groups of lines to fill up the spaces between the new shapes. Do not cross lines.
Continue until all spaces are filled up with parallel groups of straight lines.

Step 4:
Trace with black marker and add color with the materials of your choice. Colored pencil, markers, or paint work the best! Stay inside your lines and try to create patterns with some groupings. Challenge yourself and limit your palette to only a few colors. Try coloring in themes of colors like warm and cool colors, opposites, contrasting colors, tints and shades, complimentary colors, primary colors, or secondary colors.
